

MOULEX[®] DG2-7

Wetting and release agent

GENERAL

The **MOULEX[®] DG2-7** is a wetting and parting agent efficient to improve the resin penetration into the paper, increasing surface quality and gloss. It can be used both in the first and second bath and is compatible with urea, melamine and mixed resins. It is especially suitable for dark or metallic decorative papers.

Even with very small quantities, the **MOULEX[®] DG2-7** could improve the flow of the resin and guarantee excellent releasing properties.

PHYSICAL PROPERTIES

Form	: liquid
Colour	: colourless
Active content	: 15 ± 1%
pH	: 7 ± 1
Shelf life	: 1 year if stored in closed container and protected from frost

RECOMMENDATION FOR APPLICATION

Dosage: usually 0.2 – 0.5 % on impregnating resin.
We recommend starting with 0.5% in the baths, and decreasing progressively.

PACKAGING

Container of 1000 litres
