

MOULEX® WE07I Release agent for paper impregnation

GENERAL

MOULEX® WE07I is an additive which used to remove sticking and fouling problems under the laminating press.

MOULEX® WE07I is perfectly compatible with resins in aqueous system, such as UF, MUF or phenolic glues.

Its utilization, even with small percentage, leads to enhance the quality of impregnated papers and reduces dirt build up on the press.

PROPERTIES

Appearance	: Liquid
Color	: Yellow
Active content	: $20 \pm 1\%$
pH	: 7 ± 1
Solubility	: Water soluble

Shelf life: 1 year if stored in closed container and protected against frost.

RECOMMENDATION FOR APPLICATION

Dilution: 0.1% to 0.2% of liquid glue, in the second bath.

- + Reduces dirt build up on the press during paper press on the panel step.
- + Reduces cleaning cycles.
- + Enhance the general aspect of the decor surface: Absence of spots, gloss etc.
